# OUR STORY

2021 **CREATION OF E-SURF SPORT**

2021 **CREATION OF THE RACE X**

2024 **CREATION OF THE EZY**

**Founded in Montreal** and now located in Drummondville, e-surf is a company dedicated to **shared** the ultimate watersports experience for families.

The brand's growth across Canada in recent years demonstrates an insatiable pursuit of **innovation**, **accessibility**, and **efficiency**.

# PROUDLY FAMILY-OWNED BUSINESS

What began as a family venture is now driven by a growing team of talented and passionate individuals. Together, we continue to push the boundaries of innovation to deliver the best possible experience on the water.

## INTERCHANGEABLE BATTERY

Our **swappable battery technology** makes removing and installing the battery quick and effortless, thanks to a secure one-click locking mechanism.
It lets you replace a depleted battery with a fully charged one and get back on the water right away.

This system makes the board **easy and accessible** for the whole family — from the youngest to the oldest, anyone can use it confidently.

Each battery is built with **premium-grade cells**, ensuring a lifespan of over 500 cycles.

The battery level indicator is conveniently displayed on top, allowing riders to check the charge status at a glance.
Charging is simple and intuitive: just connect the charger to a standard household outlet (110–120 V).

Our batteries are certified under UN 38.3 and UN 3480 standards for international safety compliance.

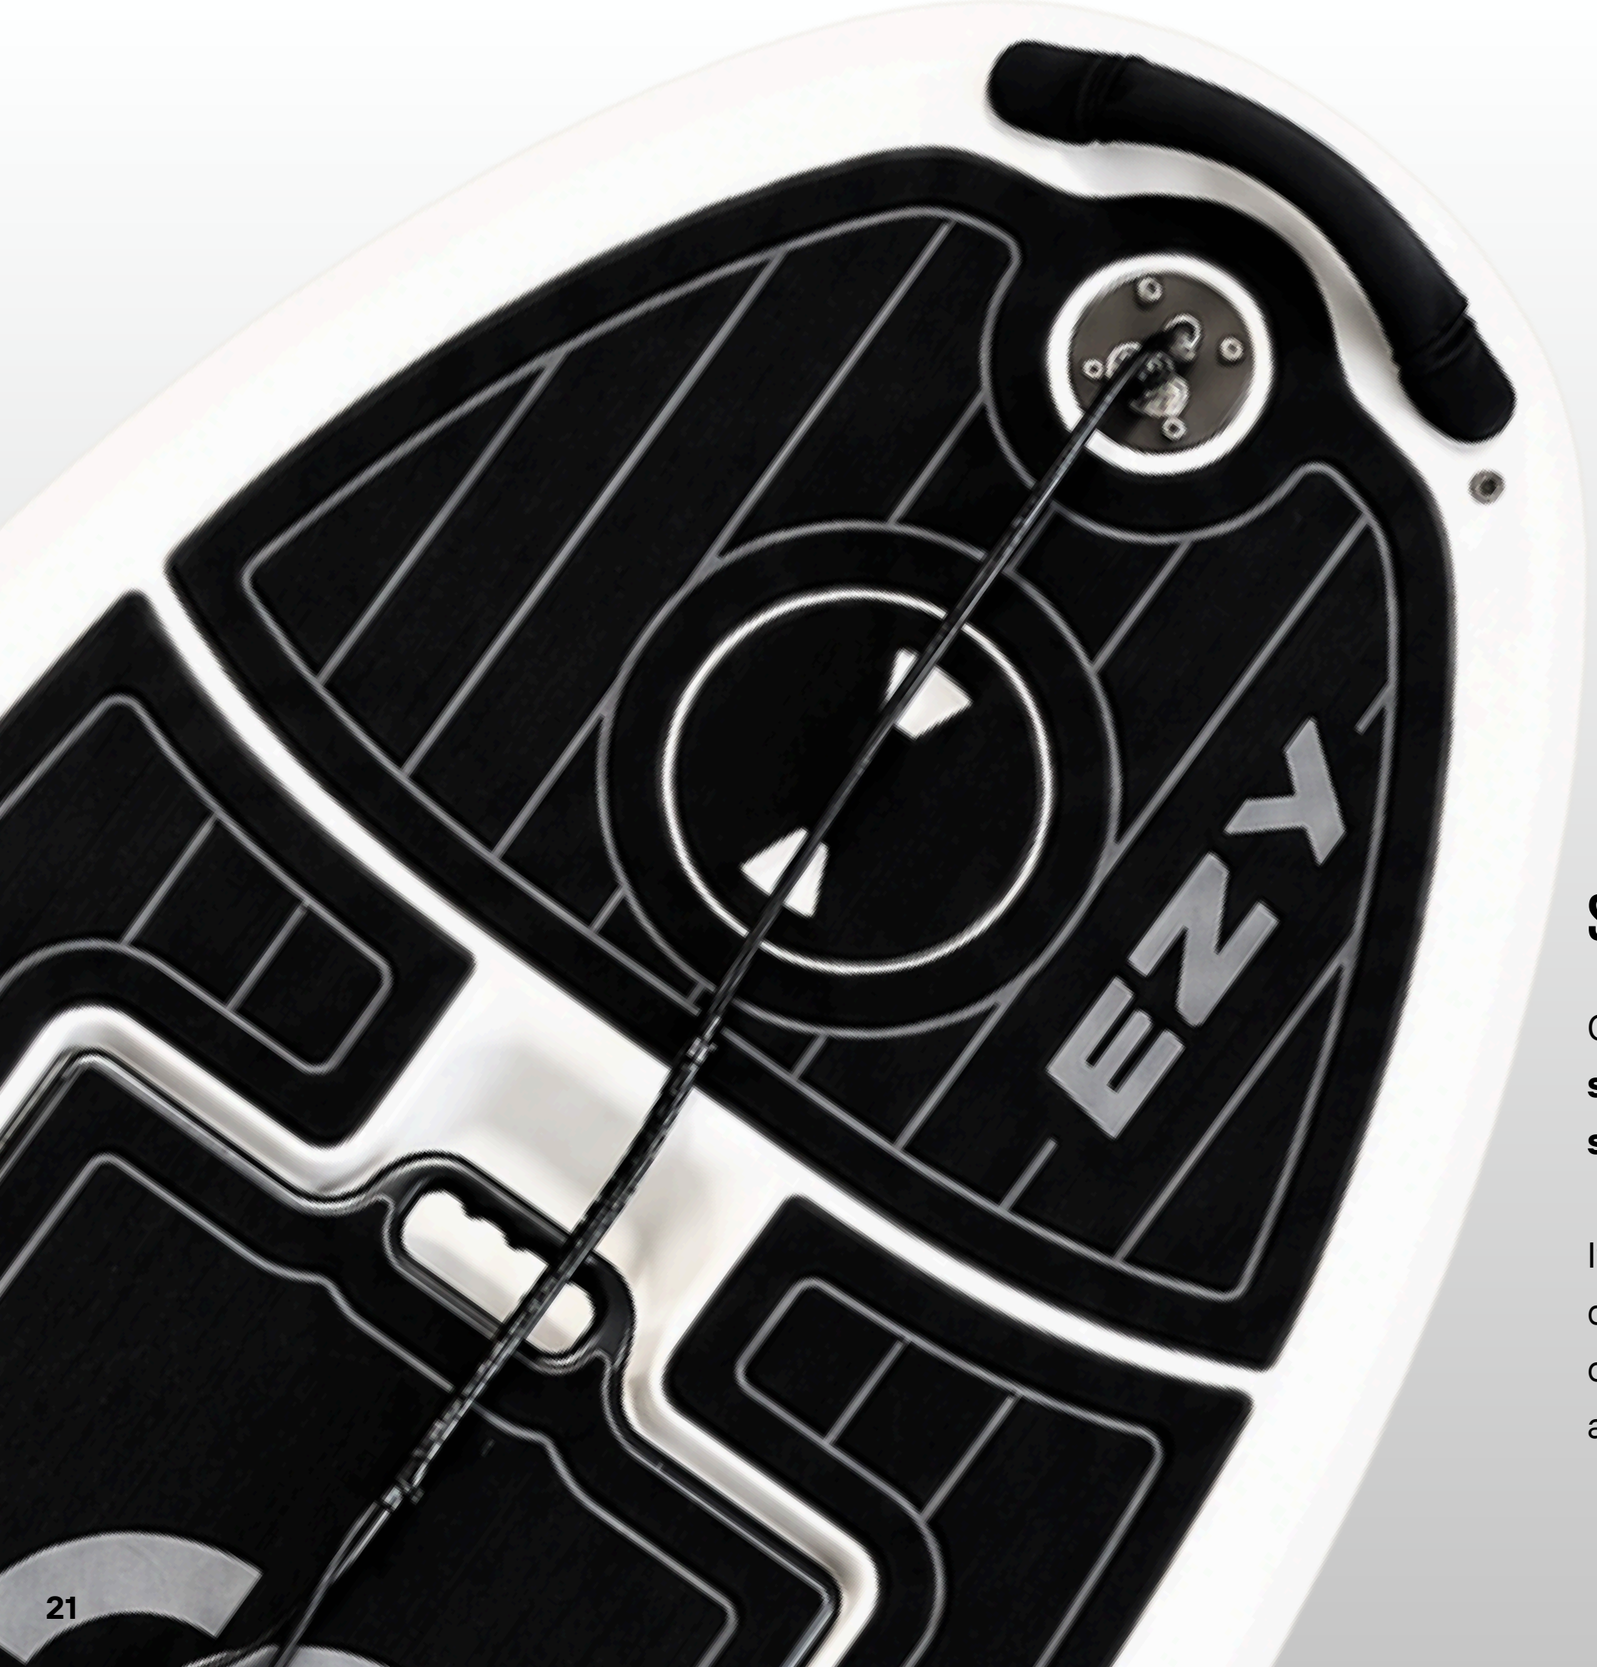
# ENGINE CUT-OFF SWITCH SYSTEM (ECOS)

The power cut-off system is a sophisticated technology that **puts user safety at the heart of our concerns.** The security wristband connected to the controller connects and disconnects easily in the event of a fall in the water or an intentional disconnection.

The **nylon cable** connecting the handle to the board provides better stability and serves as a support point when gently pulling on it.

The **safety wristband** is equipped with a built-in compass and whistle for added safety on the water.

**The battery life appears on the controller,** so you'll always know the remaining time of the battery.



## STORAGE SECTION

Our storage section is **specially designed to store safety items recommended for water sports.** You can also store personal items.

It is easily accessible since our board is designed with a **high level of flotation**. You can lie down, sit, kneel or stand and easily access the storage.

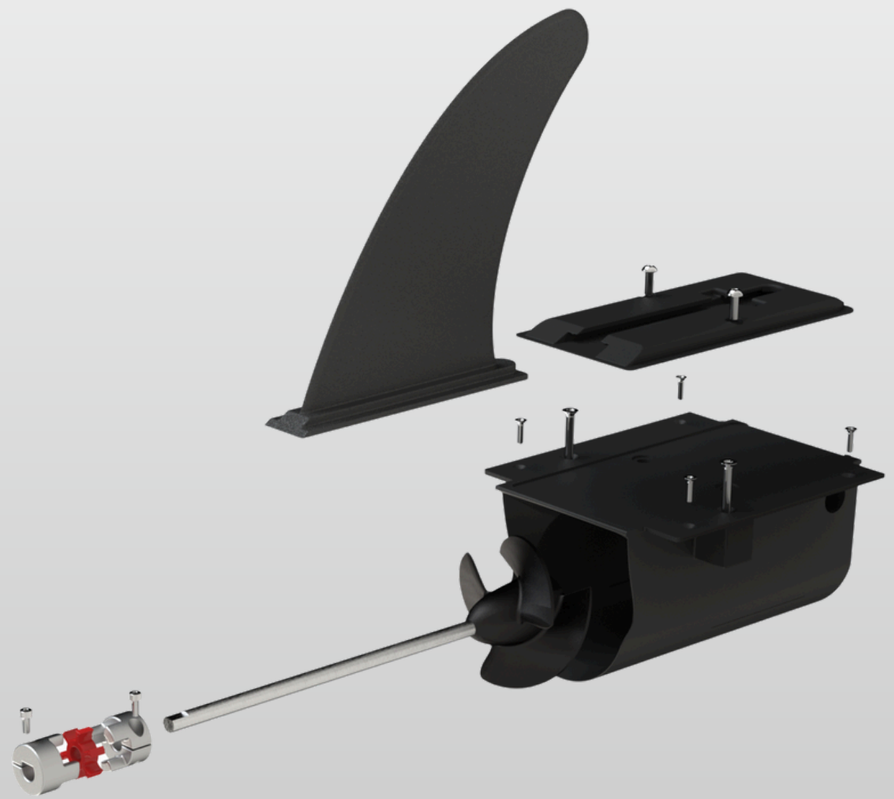
# SAFE TURBINE

Our axial **water jet propulsion** is an innovation in the world of water sports, combining **efficiency, safety, and quiet operation.**

The jet propulsion system keeps the board **naturally stable** on the water, making it safer than foil-based technologies. With no sharp fins or exposed parts, it’s perfectly suited for the whole family. Furthermore, **the turbine doesn't emit harsh noise**, allowing you to have fun without disturbing your neighbors!

The turbine is fully integrated into the board, allowing for easy starts even in shallow water.

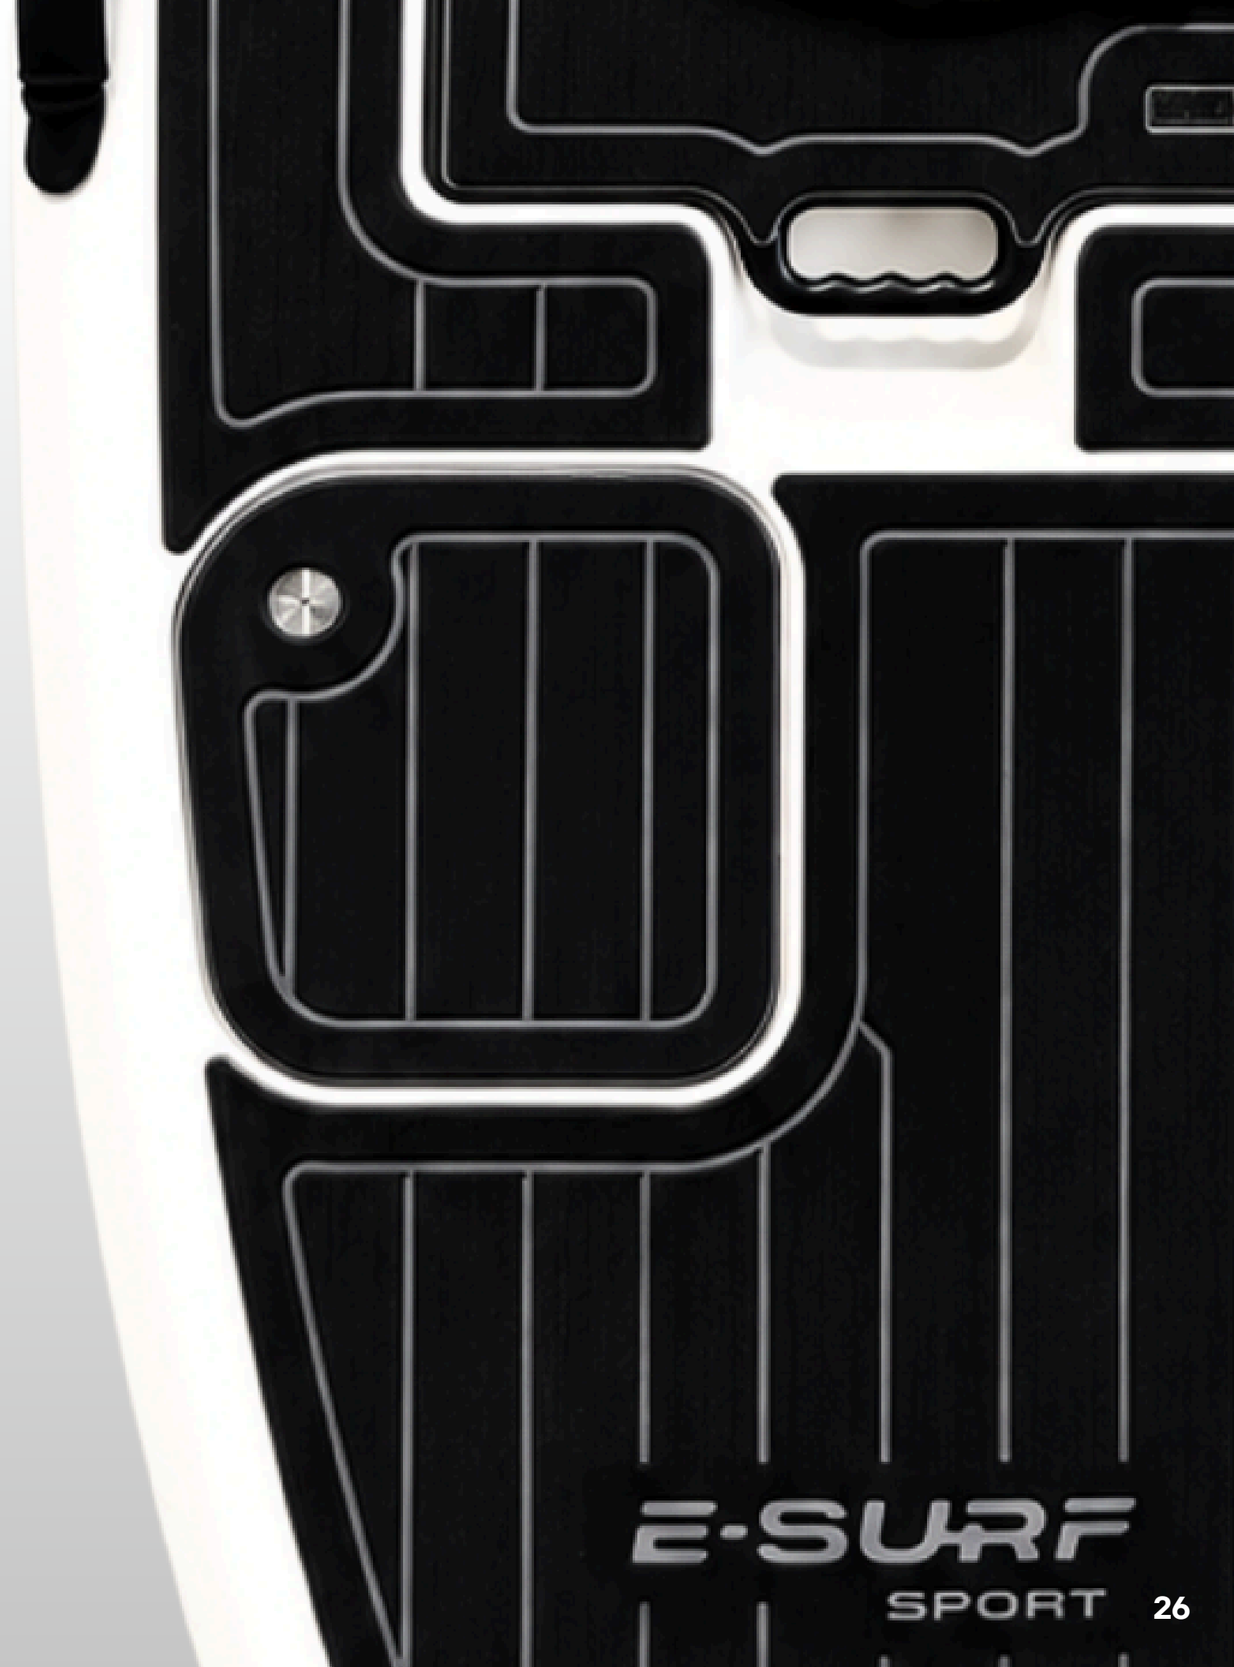
You can take off effortlessly in as little as two feet of water, just as easily as in the middle of the lake.



# SPEED

Our board is equipped with a lockable mode for parental control. The goal is to allow the smallest to be able to use the board safely. The beginner/child mode goes to a maximum of **10 mph**. The user can also choose the standard mode which goes up to **19 mph** for the **EZY Standard**.

The **EZY Pro** has a similar system with a beginner lockable mode at **10 mph** as well as an standard mode of up to **26 mph.**



# MATERIAL

Our board is made by **rotomolding**, a technology that forms a monocoque without a seal. A technology that reduces the risk of water inflow and adds increased durability,

HDPE (high density polyethylene) provides **excellent impact absorption** and is resistant to scratches, UV and salt water. It is the ideal material for a robust, tolerant and easy-care board.

With a volume of **155 L**, it offers a high lift which translates into excellent stability at standstill and during the start-up phases (waterstart). This leads to a higher level of safety in troubled water.

# EZY STANDARD

$ 7.900

**-Rules differ by state; may require boating safety certificate**
**-Registration as a motorized vessel.**
**-USCG safety: wear a life jacket, carry a whistle, use ECOS.**

# TECHNICAL SPECIFICATIONS

## Board

| | |
|---|---|
| Turbine: | Water Jet - Axial jet propulsion |
| Motor: | 5k watts |
| Speed: | Beginner – 10 mph |
| | Standard – 19 mph |
| Required Age: | Age & supervision depend on the state. |
| Board Weight: | 206 cm x 87 cm - 60 lbs |
| Maximum Weight: | Maximum 225 lbs |

## Battery light

| | |
|---|---|
| Lifespan: | Up to 45 minutes* |
| Recharge Time: | 2h with an 84V, 14A charger |
| Range: | 32 AH 72 V |
| Power: | 2,304 watts |
| Cells: | Cylindrical lithium-ion |
| Weight: | 35 lbs |

| | |
|---|---|
| **Warranty:** | Three (3) years on the hull and two (2) years on the battery and electronic components. |
| **Materials:** | Rotomolded HDPE |
| **Transport and Mobility:** | EZY models are equipped with removable wheels. |

*Weight and speed affect lifespan

# EZY PRO

$ 9.900

**-Rules differ by state; may require boating safety certificate**
**-Registration as a motorized vessel.**
**-USCG safety: wear a life jacket, carry a whistle, use ECOS.**

# TECHNICAL SPECIFICATIONS

## Board

| | |
|---|---|
| Turbine: | Water Jet - Axial jet propulsion |
| Motor: | 7.5 k watts |
| Speed: | Intermediate – 10 mph |
| | Expert – 26 mph |
| Required Age: | Age & supervision depend on the state. |
| Board Weight: | 206 cm x 87 cm - 60 lbs |
| Maximum Weight: | Maximum 300 lbs |

## Battery performance

| | |
|---|---|
| Lifespan: | Up to 75 minutes* |
| Recharge Time: | 3h with an 84V, 14A charger |
| Range: | 48 AH 72 V |
| Power: | 3,456 watts |
| Cells: | Cylindrical lithium-ion |
| Weight: | 49 lbs |

| | |
|---|---|
| **Warranty:** | Three (3) years on the hull and two (2) years on the battery and electronic components. |
| **Materials:** | Rotomolded HDPE |
| **Transport and Mobility:** | EZY models are equipped with removable wheels. |

*Weight and speed affect lifespan

# RACE X

$ 13.500

**-Rules differ by state; may require boating safety certificate**
**-Registration as a motorized vessel.**
**-USCG safety: wear a life jacket, carry a whistle, use ECOS.**

# TECHNICAL SPECIFICATIONS

## Board

| | |
|---|---|
| Turbine: | Water Jet- Axial jet propulsion |
| Motor: | 12 k watts |
| Speed: | Expert – 35 mph |

# TESTIMONIALS

**Stephanie**

*Hey, I don't know if you remember Oliver, he tried the e-surf at the Orillia boat show in June and we bought one that day.*

*He had the best summer ever and is already counting the day until he can get back out on his board.*

**Sebastien**

*A real gem, I've done 102 rides with the board. It's going great, I wax my board every week.*

**Stephane**

*A whole machine, reserve the EZY model for my wife!*

**Alexandre**

*The board has been well used and users give it a score of 10. Very good feeling, very efficient and all that, without disturbing others or polluting. In short, we are very happy with the purchase!*

**Jasmine**

*Even my mother tried it. We are very happy with our purchase!*

**Marcus**

*These people are the friendliest people ever and this product is top tier I highly recommend, over all my experience was awesome, if you're thinking of buying from them your hearing from me that you'll be in good hands.*
