Half Yearly Compliance Report
2026
01 Dec(01 Apr - 30 Sep)

Acknowledgement

Proposal Name	Expansion of existing Steel making and Rolling mill Industrial Unit by M/s. Met Rolla Steels Pvt. Ltd.
Name of Entity / Corporate Office	M/s. Met Rolla Steels Pvt. Ltd.
Village(s)	MULAVUR
District	ERNAKULAM

Proposal No.	SIA/KL/IND1/405847/2022
Plot / Survey / Khasra No.	
State	KERALA
MoEF File No.	1972/EC3/2022/SEIAA

Category	Industrial Projects - 2
Sub-District	Muvattupuzha
Entity's PAN	*****5996K
Entity name as per PAN	MET ROLLA STEELS PRIVATE LIMITED

Compliance Reporting Details

Reporting Year	2026
Remarks (if any)	Half Yearly Compliance Report for the period April 2026 to September 2026
Reporting Period	01 Dec(01 Apr - 30 Sep)

Details of Production and Project Area

Name of Entity / Corporate Office M/s. Met Rolla Steels Pvt. Ltd.

	Project Area as per EC Granted	Actual Project Area in Possession
Private	2.91	2.91
Revenue Land	0	0
Forest	0	0
Others	0	0
Total	2.91	2.91

Others Area

Sr. no	Other Name	Area Granted	Area Actual

Production Capacity

Sr. no	Product Name	units	Valid Upto	Capacity	Production last year	Capacity as per CTO
1	Ingots/Billets	Tons per Annum (TPA)	N/A	90000	17716	
2	TMT Bars	Tons per Annum (TPA)	N/A	90000	41346	

Conditions

Specific Conditions

Sr.No.	Condition Type	Condition Details
1	MISCELLANEOUS	Products and Plant capacity (In TPA) of existing is Ingots/Billets 27,000 and MS Bars/TMT Bars 75,000, Proposed is Ingots/Billets 63000 and MS Bars/TMT Bars 15,000. Total production is M S Bars/TMT 90,000 TPA and Ingots/Billets 90,000 TPA.
PPs Submission: Agreed to Comply The plant is currently functioning at full capacity, and preparations for its expansion are underway. Once the expansion is completed, the plant will have the capability to produce 90,000 TPA of MS Bars/TMT and 90,000 TPA of Ingots/Billets. Progress on the expansion work at the project site is ongoing.		Date: 23/10/2026
2	GREENBELT	Green belt should be developed as per the plan and geotagged photographs should be submitted along with HYCR. The suggested species are Phyllanthus emblica (Nelli), Syzygium cumini (Njaval), Writia tinctoria (Dhanthapala), Ficus bengalensis (Peral), Ficus racemosa (Atti), Bambusa bamboos (Mullumula), Dendrocalamus strictus (Kallan mula), Strychnos nux-vomica (Kanjiram), Terminalia catappa (Thanni), Schleichera oleosa (Poovam), Artocarpus hirsutus (Ayiniplavu), etc.
PPs Submission: Being Complied The project proponent has initiated the creation of a green belt in accordance with the submitted proposal. Recommended species have been included in the green belt's development. This green belt will be preserved throughout the project's duration. The geotagged photographs and details of plant purchase has been attached as a document.		Date: 23/10/2026
3	GREENBELT	The survival rate of the planted trees should be monitored regularly and reported in the HYCR
PPs Submission: Agreed to Comply Ongoing assessment and documentation of the survival rate of the planted trees will be conducted, and the project partner has commenced tree planting activities.		Date: 23/10/2026
4	WATER QUALITY MONITORING AND PRESERVATION	Adequate measures should be taken to harvest the rainwater as per the guidelines issued by the Central Ground water Authority.
PPs Submission: Agreed to Comply To promote water conservation, the PP has constructed a rainwater harvesting system on the premises with an intended capacity. The tank, initially holding 145 KL, will be enlarged as the project progresses.		Date: 23/10/2026
5	AIR QUALITY MONITORING AND	The concentration of PM2.5, PM10, and Noise level should be monitored half yearly up to 500m radius of the factory and reported

	PRESERVATION	in the HYCR.
PPs Submission: Agreed to Comply The project proponent has been regularly monitoring the ambient air quality and noise levels within a 500-meter radius of the factory. The monitoring result of noise and air has been attached as a document.		Date: 23/10/2026
6	Human Health Environment	Online temperature sensors should be installed at various temperature sensitive locations and the data monitored and log book maintained. The daily maximum and minimum temperature monitored should be reported in the HYCR.
PPs Submission: Complied To ensure ongoing monitoring of the plant's temperature, the PP has set up online temperature sensors at various project sites. The PP has been recording the site's maximum and minimum temperatures. Additionally, the PP maintains a spreadsheet that includes a document with images of the sensors and the recorded high and low temperatures. The copy of the spreadsheet is attached as a document.		Date: 23/10/2026
7	Human Health Environment	The workers should be provided with proper protective equipment and safeguard measures for dust and noise pollution and heat stress.
PPs Submission: Complied The project has been providing personal protective equipment (PPE), including masks, ear protection, and safety shoes, to all workers on site. Measures have been established to manage dust emissions and reduce noise pollution arising from construction activities. To protect worker health, regular heat stress assessments are performed. Work schedules are structured to minimize laborers' exposure to high temperatures, ensuring safety and adherence to environmental and labor regulations.		Date: 23/10/2026
8	ENERGY PRESERVATION MEASURES	Adequate energy conservation measures should be implemented including solar power installations. As assured by the project proponent, the total energy requirements of the factory complex other than industrial purposes shall be met by installation of an On-Grid solar power plant capacity of 30kWp.
PPs Submission: Agreed to Comply After the proposed plant expansion, the PP plans to install solar panels at the project site. A grid-connected solar power plant with a capacity of 30 kWp will be established to fulfill the energy needs of the factory complex, excluding industrial operations. This initiative promotes sustainable energy usage, decreases reliance on traditional power sources, and supports commitments to renewable energy.		Date: 23/10/2026
9	Human Health Environment	Regular occupational health check-up and safety drill should be conducted and the details should be provided in the HYCR.
PPs Submission: Complied The PP has been performing routine health assessments for workers at the plant and conducting safety drills to improve their awareness. These initiatives promote employee well-being, reinforce safety practices, and ensure adherence to health and safety regulations. Detailed information is included in the attached document.		Date: 23/10/2026
10	WATER QUALITY MONITORING AND PRESERVATION	Regular monitoring of well within and nearest to the factory premises should be monitored for water level and water quality, the latter as per PCB norms and data provided in the HYCR.
PPs Submission: Complied The project proponent has begun consistent monitoring of the water quality and levels in the well situated near the factory. This action facilitates the prompt identification of any possible effects, protects local groundwater supplies, and confirms adherence to environmental monitoring standards.		Date: 23/10/2026

11	Corporate Environmental Responsibility	The CER proposed should be implemented within the first two years and maintained on a regular basis.

PPs Submission: Agreed to Comply The Corporate Environmental Responsibility (CER) associated with the expansion project will be implemented within the initial two years and consistently upheld thereafter. Updates on the progress of CER implementation will be included in the Half Yearly Compliance Report (HYCR), promoting transparency, accountability, and compliance with regulatory standards. No CER works were executed during the reporting period.	Date: 23/10/2026

General Conditions

Sr.No.	Condition Type	Condition Details
1	Statutory compliance	The Environment Clearance (EC) granted to the project/ activity is strictly under the provisions of the EIA Notification, 2006 and its amendments issued from time to time. It does not tantamount/ construe to approvals/ consent/ permissions etc., required to be obtained or standards/conditions to be followed under any other Acts/Rules/Subordinate legislations, etc., as may be applicable to the project.

PPs Submission: Complied The project proponent has obtained necessary approvals, permissions, and consents from relevant authorities in accordance with applicable laws and regulations. The proponent has diligently complied with all project-related legislation. Supporting documents detailing the permissions and consents for project establishment are included.	Date: 23/10/2026

2	MISCELLANEOUS	The project proponent should provide notarized affidavit (indicating the number and date of Environmental Clearance proceedings) that all the conditions stipulated in the EC shall be scrupulously followed.

PPs Submission: Complied The project proponent has submitted a duly notarized affidavit affirming that all stipulations specified in the Environmental Clearance (EC) will be adhered to rigorously. The affidavit is included as an attachment.	Date: 23/10/2026

3	MISCELLANEOUS	The project proponent should advertise in newspapers that the project has been accorded Environmental Clearance and copies of clearance letters are available in the Office of State Environment Impact Assessment Authority (SELAA) and on the website of the Authority at www.seiaakerala.in. The advertisement should be in at least two local newspapers widely circulated in the region, one of which shall be in the vernacular language. The advertisement should be made within 10 days from the date of receipt of the Environmental Clearance letter and a copy of the same signed in all pages should be forwarded to the office of this Authority as confirmation.

PPs Submission: Complied The project proponent has issued notices in two prominent local newspapers, announcing that the proposed project has received Environmental Clearance (EC). The notice indicates that information regarding the clearance letter can be accessed at the Office of the State Environment Impact Assessment Authority (SEIAA) and on the authority's official website (www.seiaakerala.in). The announcement was published in both local languages and English within the required timeframe. A copy of the notice is included as an attachment.	Date: 23/10/2026

4	MISCELLANEOUS	The proponent shall send a copy of the EC to concerned Grama Panchayat/ District Panchayat Municipality/Corporation/Urban Local Body and also to the Local NGO, if any, from whom suggestions/representations, if any, were received while processing

		the proposal. The Environmental Clearance shall also be uploaded on the website of the company.
PPs Submission: Complied The Environmental Clearance has been forwarded by the PP to the Grama Panchayat. Furthermore, the EC is available on the official website to ensure transparency and public access, thereby enhancing stakeholder confidence and adherence to regulations.		Date: 23/10/2026
5	MISCELLANEOUS	All the statutory clearances should be obtained, as applicable, by the project proponent from the respective competent authorities. Copies of all statutory clearances shall be submitted along with First Half Yearly Compliance Report.
PPs Submission: Complied The project has obtained all required legal approvals. The expansion plans are now underway at the site. The copies of the necessary licenses and permits have been attached as a document.		Date: 23/10/2026
6	Statutory compliance	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the State Expert Appraisal Committee.
PPs Submission: Being Complied The PP is actively implementing the Environmental Impact Assessment (EIA) and Environmental Management Plan (EMP) reports, along with the statements made during the public hearing and the presentation to the State Expert Appraisal.		Date: 23/10/2026
7	AIR QUALITY MONITORING AND PRESERVATION	The project proponent shall monitor fugitive emissions in the plant premises in every six months through laboratories recognized under Environment (Protection) Act, 1986 or NABL accredited laboratories
PPs Submission: Complied The PP has consistently monitored fugitive emissions on the plant's property at regular intervals. This monitoring has been carried out by laboratories accredited by NABL or recognized under the Environment (Protection) Act, 1986. The copy of the monitoring result is attached as a document.		Date: 23/10/2026
8	AIR QUALITY MONITORING AND PRESERVATION	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards
PPs Submission: Complied To ensure compliance with stack and fugitive emission standards in the project area, the PP has installed an Air Pollution Control (APC) system at all points generating dust. Additionally, sprinklers have been set up across the project site to further reduce dust emissions. A document containing a picture of the sprinklers is attached.		Date: 23/10/2026
9	AIR QUALITY MONITORING AND PRESERVATION	The gaseous emissions and effluent discharges from various process units should confirm to load/mass based standards notified by the Ministry on 19th May 1993 and standards prescribed from time to time. The KSPCB may specify more stringent standards for the relevant parameters keeping in view the nature of the industry and its size and location. At no time the emission level should go beyond the prescribed standards
PPs Submission: Complied The PP has implemented effective measures to ensure emissions comply with the Pollution Control Board's standards. Gaseous emissions and effluent discharges from various process units are consistently maintained in accordance with the load/mass-based standards established by the Ministry on May 19, 1993, as well as any updated standards, ensuring ongoing environmental		Date: 23/10/2026

compliance.		
10	AIR QUALITY MONITORING AND PRESERVATION	Effective safeguard measures such regular water sprinkling and/or sufficient number of mobile or stationery vacuum cleaners shall be provided in critical areas. prone to air pollution such as haul road, loading and unloading points and transfer points and having high levels of PM 10 and PM 2.5
PPs Submission: Complied To minimize dust emissions at transfer points and driveways, the project proponent has implemented strategies including water spraying and stationary vacuum cleaners. Furthermore, sprinklers have been set up throughout the project area to enhance dust management. A photo of the sprinkler is included as an attachment.		Date: 23/10/2026
11	AIR QUALITY MONITORING AND PRESERVATION	The project proponent shall monitor the criteria pollutants level namely: PM10, PM 2.5 SO2 NOx, (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location near the entry gate for disclosure to the public and put on the website of the company.
PPs Submission: Complied The Project Proponent has conducted monitoring of several ambient air quality and stack emission parameters. The results of this monitoring are clearly displayed in a visible area near the entry gate for public access and have also been made available on the company's official website to promote transparency and accessibility for stakeholders.		Date: 23/10/2026
12	AIR QUALITY MONITORING AND PRESERVATION	Design the ventilation system for adequate air changes as per prevailing norms for all tunnels, motor houses, oil cellars.
PPs Submission: Agreed to Comply To guarantee sufficient air changes within the building, a suitable ventilation system has been installed. During the expansion phase, an improved ventilation system will also be installed to guarantee occupational safety and adhere to regulations.		Date: 23/10/2026
13	Statutory compliance	Project proponent should obtain necessary prior permission of the competent authorities for drawing requisite quantity of surface water and ground water for the project, if required
PPs Submission: Agreed to Comply The PP does not need to construct additional wells on the plant's property. Furthermore, as adequate arrangements are already established, there is no need for permission to extract the required amount of water.		Date: 23/10/2026
14	WATER QUALITY MONITORING AND PRESERVATION	Rain Water Harvesting facility should be installed as per the prevailing provisions of KMBR/KPBR, unless otherwise specified.
PPs Submission: Complied The project proponent has established a rainwater harvesting system on the plant premises. Since the Kerala Municipality Building Rules (KMBR) and Kerala Panchayat Building Rules (KPBR) do not apply to this industrial facility, a specialized rainwater harvesting tank with a capacity of 145 KL has been built at the site. This system is designed to efficiently collect and utilize rainwater, supporting sustainable water management practices.		Date: 23/10/2026
15	WATER QUALITY MONITORING AND PRESERVATION	The project proponent shall monitor regularly the effluent and the ground water quality at least twice in a year (pre- and post-monsoon) at sufficient numbers of piezometers/sampling wells in the plant and adjacent areas through labs recognized under Environment (Protection) Act, 1986 and NABL accredited laboratories

PPs Submission: Complied The Project Proponent consistently monitors groundwater and effluent quality. Testing is performed by laboratories accredited by the National Accreditation Board for Testing and Calibration Laboratories (NABL), guaranteeing precision and adherence to established standards. The documented test results are included for verification and compliance purposes.		Date: 23/10/2026
16	WATER QUALITY MONITORING AND PRESERVATION	Garland drains and collection pits shall be provided for the effective management of storm water to arrest the run-off in the event of heavy rains and to check the water pollution due to surface run off.
PPs Submission: Complied The PP has provided the garland drains and collection pits to ensure effective management of stormwater, thereby arresting runoff during heavy rains and preventing water pollution from surface discharge. The pictures of drain is attached as a document.		Date: 23/10/2026
17	GREENBELT	Green belt with appropriate fast growing indigenous species of trees on circular rows should be developed all around the compound of the plant to serve as a buffer beyond which industrial activity must not be carried out
PPs Submission: Complied A green belt featuring rapidly growing native tree species, organized in circular patterns, has been established around the plant compound to act as a buffer zone. Furthermore, numerous mature trees are already present on the project site, adding to the existing green cover and promoting ecological balance. Additional details are included in the attached document.		Date: 23/10/2026
18	ENERGY PRESERVATION MEASURES	Maximum possible solar energy generation and utilization shall be ensured as an essential part of the project.
PPs Submission: Agreed to Comply The project will prioritize optimal solar energy generation and usage as a key element. Ongoing expansion activities at the site will include the installation of solar panels as part of sustainable development initiatives, which will help decrease reliance on traditional energy sources and strengthen commitments to renewable energy.		Date: 23/10/2026
19	Human Health Environment	Occupational health surveillance of the workers shall be done on a regular basis and records maintained.
PPs Submission: Complied The PP has been performing routine health assessments for workers at the plant and conducting safety drills to improve their awareness. These initiatives promote employee well-being, reinforce safety protocols, and ensure adherence to health and safety regulations.		Date: 23/10/2026
20	Risk Mitigation and Disaster Management	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
PPs Submission: Being Complied The Project Proponent (PP) has developed an Emergency Preparedness Plan informed by the Hazard Identification and Risk Assessment (HIRA) and the Disaster Management Plan (DMP). This plan is actively being executed to guarantee preparedness and a swift response to possible emergencies.		Date: 23/10/2026
21	Human Health Environment	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms.
PPs Submission: Agreed to Comply The PP will conduct heat stress assessments for employees working in high-temperature areas. All staff members are provided with personal protective equipment (PPE) that meets established		Date: 23/10/2026

standards. To reduce heat exposure and ensure the safety of workers, the PP has implemented further safety measures within the facility.		
22	MISCELLANEOUS	A separate Environmental Management Cell (EMC) with suitable qualified personnel should be set-up under the chairmanship of a Senior Executive, who will report directly to the Head of the Organization. The Cell should have representative of Biodiversity Management Committee of the Panchayat and a representative of NGO, if any active in the area. The EMC should meet at least once in six months and review the activities and minutes should be a part of the compliance report.
PPs Submission: Complied The Project Proponent (PP) has constituted a separate Environmental Management Cell (EMC) comprising suitably qualified personnel under the chairmanship of Mr. Kurian Varghese. The EMC convenes meetings on a regular basis to review environmental management activities and ensure compliance with prescribed standards.		Date: 23/10/2026
23	Statutory compliance	The stipulations by Statutory Authorities under different Acts and Notifications should be complied with, including the provisions of Water (Prevention and Control of Pollution) Act. 1974, the Air (Prevention and control of Pollution) Act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and ELA Notification, 2006.
PPs Submission: Being Complied All the conditions and directions stipulated by the authority are being followed accordingly. Furthermore, the proponent is following the eminent regulations of the land, like 1. Water (Prevention and Control of Pollution) Act, 1974. 2. The Air (Prevention and Control of Pollution) Act, 1981. 3. The Environment (Protection) Act, 1986. 4. Solid Waste Management Rules, 2016. 6. Plastic Waste Management and Handling Rules, 2016. 7. Construction and Demolition Waste Management Rules, 2016. 8. The Public Liability (Insurance) Act, 199. 9. EIA Notification, 2006.		Date: 23/10/2026
24	Corporate Environmental Responsibility	Corporate Environmental Responsibilities (CER) Plan as prescribed by SEIAA/SEAC should be carried out leading to Environmental stability of the Project region. The completed projects and installations as part of the CER Plan should be maintained and monitored during the EC period. The activities carried out under CER should form a part of the half yearly compliance report. The certificates from the beneficiaries, if the CER part is completed should also be submitted to the State Environment Impact Assessment Authority (SEIAA) along with year wise expenditure.
PPs Submission: Agreed to Comply The Project Proponent (PP) has initiated discussions to carry out various activities under Corporate Environment Responsibility (CER). In line with the requirements, the commitments made before SEIAA/SEAC will be fulfilled within a two-year timeframe. No CER activities executed during the reporting period.		Date: 23/10/2026
25	Corporate Environmental Responsibility	The proponent shall submit Half Yearly Compliance Reports (1 of June and 1 of December) on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) and upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall be simultaneously sent to the respective Regional Office of Ministry of Environment. Forests and Climate Change, Govt. of India and also to the Office of State Environment Impact Assessment Authority (SEIAA). The proponent has to submit Environmental statement in form of Environment (Protection) Rules 1986 to SPCB on 31 March

		every year.
PPs Submission: Complied The Half Yearly Compliance Report for the project is being submitted to the Regional Office of the Ministry of Environment, Forest and Climate Change, Government of India, in Bangalore. This submission includes the results of monitored data accessed through the PARIVESH portal and is also being sent to the State Environmental Impact Assessment Authority (SEIAA) in Kerala via email. Additionally, the Project Proponent has been providing the Environmental Statement in accordance with the Environment (Protection) Rules, 1986, to the State Pollution Control Board (SPCB). The monitored data is included as a supporting document.		Date: 23/10/2026
26	MISCELLANEOUS	The Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the Environment Clearance under the provisions of the Environment (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
PPs Submission: Agreed to Comply The project proponent is ready to adopt all extra safeguard measures recommended by the authority, alongside the conditions outlined in the granted environmental clearance. These actions will be taken to guarantee complete compliance and enhance environmental protection at the project location.		Date: 23/10/2026
27	Statutory compliance	In case of transfer of EC the matter shall be intimated and approval from the Authority shall be obtained as per the existing norms.
PPs Submission: Agreed to Comply Currently, there are no plans to transfer the Environmental Clearance (EC). If there is any plan to transfer EC in future, the Authority will be properly notified, and approval will be secured following the established norms and procedures.		Date: 23/10/2026
28	Statutory compliance	No further expansion or modification in the plant should be carried out without prior approval of the Authority and in accordance with the notifications of MoEF and CC from time to time.
PPs Submission: Agreed to Comply For any further expansion or modification of the plant, the PP will obtain prior approval from the Authority and will do so in strict accordance with the notifications issued by the Ministry of Environment, Forest, and Climate Change from time to time.		Date: 23/10/2026
29	Statutory compliance	The EC given will be withdrawn by the Authority at any time if the area is declared high hazardous by the SDMA.
PPs Submission: Agreed to Comply The Project Proponent will comply with the directives of the Authority upon the area being designated as highly hazardous by the State Disaster Management Authority (SDMA), thus ensuring full compliance with regulatory standards and protecting environmental and community welfare.		Date: 23/10/2026
30	Statutory compliance	The SEIAA may revoke or suspend the order, for non-implementation of any of the specific or any of the above conditions. The SEIAA reserves the right to alter modify the above conditions or stipulate any further condition in the interest of environmental protection.
PPs Submission: Agreed to Comply The project proponent is adhering to the requirements outlined in the Environmental Clearance (EC). Additionally, the project proponent is willing to comply with any further conditions that the Authority may impose for the sake of environmental conservation.		Date: 23/10/2026
31	Statutory compliance	The Environmental Clearance will be subject to the final order of

		the courts on any pending litigation related to the land or project, in any court of law.
PPs Submission: Agreed to Comply There is no litigation pending against the land or project before any court of law.		Date: 23/10/2026
32	Statutory compliance	Concealing the factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act. 1986.
PPs Submission: Agreed to Comply The PP has not concealed any factual information nor submitted false or fabricated data to SEIAA/SEAC during the appraisal process for obtaining environmental clearance (EC).		Date: 23/10/2026
33	MISCELLANEOUS	The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures, to have proper checks and balances and to bring into focus any infringements / deviation / violation of the environmental / forest / wildlife norms / conditions. The company shall have defined system of reporting infringements / deviation / violation of the environmental/ forest wildlife norms / conditions and / or shareholders / stake holders. The copy of the board resolution in this 'regard shall be submitted to the MoEF and CC as a part of half yearly compliance reports
PPs Submission: Complied The PP has developed an environmental policy that has received formal approval from the Board of Directors. This policy outlines Standard Operating Procedures (SOPs), incorporates necessary checks and balances, and guarantees that any breaches, deviations, or violations of the Environmental Clearance (EC) are swiftly recognized and appropriately managed. A copy of the policy is attached as a document.		Date: 23/10/2026
34	Statutory compliance	Concealing factual data or submission of false fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
PPs Submission: Agreed to Comply The PP has not concealed any factual information nor submitted false or fabricated data to SEIAA/SEAC during the appraisal process for obtaining Environmental Clearance (EC).		Date: 23/10/2026
35	Statutory compliance	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data/ information/monitoring reports.
PPs Submission: Agreed to Comply The PP will fully cooperate with the regional office officers by providing all necessary data, information, and monitoring reports as needed, thus promoting transparency and adherence to regulations.		Date: 23/10/2026
36	Statutory compliance	Any appeal against this EC shall lie with the National Green Tribunal, if preferred. within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
PPs Submission: Complied No appeal has been filed within 30 days of time.		Date: 23/10/2026
37	Statutory compliance	The above conditions shall prevail notwithstanding anything to the

		contrary, in consistent, or simplified, contained in any other permit, license and consent given by any other authority for the same project.

PPs Submission: Complied The project proponent is fulfilling all requirements outlined in the Environmental Clearance (EC) to demonstrate its dedication to environmental protection, thus ensuring compliance with regulatory standards and the sustainable execution of the project.	Date: 23/10/2026
