DENTAL SLEEP MEDICINE

Through an Oral-Systemic Lens

Professional Coaching & Clinical Mentorship

Led by Kathleen Carson, DDS

Build or strengthen your dental sleep medicine services through an integrated approach to airway, sleep, jaw function, oral health, and whole-person care. Choose the level of professional mentorship and implementation support that fits your practice.

01

HIGH-TOUCH PARTNERSHIP

Embedded Practice Launch

Hands-on support for select practices establishing a dental sleep medicine service line. Includes customized in-practice guidance, doctor and team training, and progressive transition of workflows and patient care to your team.

02

SIX-MONTH STRUCTURED PROGRAM

Practice Setup & Clinical Mentorship

Implementation coaching to develop intake, screening, imaging, SleepImage and radiology workflows. Includes case-based learning, written case reviews, clinician discussion, team support, and practical troubleshooting.

03

TARGETED CASE SUPPORT

Case Assessment & Clinician Consultation

For practices with established systems. Submit a complete patient case packet for a customized written Dental Sleep Case Assessment Report, with optional clinician-to-clinician consultation.

Find the right level of support for your practice.

Engagements are tailored to your current systems and goals. Contact us to discuss program details and availability.
