Caring for your garments

FERN MEDICAL SUPPLIES

For stockings, sleeves, gloves, Velcro wraps and nighttime garments. General tips only. Always follow your manufacturer's care instructions.

Washing

1. Wash often. It helps your garment keep its squeeze.
2. Close any Velcro straps. Turn it inside out. Wash by hand or on a gentle cycle with mild soap.
3. Skip fabric softener, bleach and dryer sheets.

Drying

1. Roll it in a towel and press out the water. Don't wring it.
2. Air dry away from heaters and direct sun. Use a dryer on low only if the label says it's OK.

Fit Daytime garments feel snug. Velcro wraps feel snug and even. Nighttime garments feel a little roomier.

Time for new ones? Contact Fern if your garment feels loose, has holes or runs, slides down, or the straps won't stay closed. We'll help you reorder.

Take it off and call your doctor if you have

Numbness, tingling, pale or blue toes or fingers, worsening pain, or new skin breakdown. **In an emergency, call 911.**
