Vivace E: The Evolution of Elegance and Functionality

The high-gloss white finish, pure and refreshing, enhances any room with its understated elegance, while the slim profile and curved corners ensure that the switch doesn't just fit in – it stands out.

- Slim profile
- Sleek, frameless large panel
- Curved corner design

Elegance in Perfect Balance

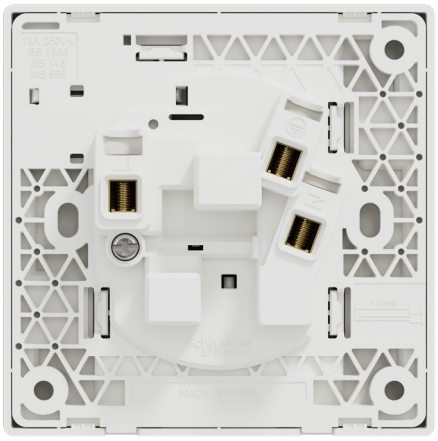

- Exquisite aesthetics, blends seamlessly into various interior styles
- Smooth touch, gentle pressure, and strong rebound, balancing aesthetics with practicality

Feel the craftsmanship:
Effortless installation and safety design

- Enlarged socket terminals, allowing effortless insertion of 2×4 mm cables, making looping and connecting larger adapters or plugs a breeze
- Bottom holes on the cover for quick and hassle–free dismantling, simplifying the process for users and electricians alike
- Equipped with a safety shutter for added protection, ensuring peace of mind

Adapt to the modern world

Innovative design that anticipates your needs and adapts to the modern world

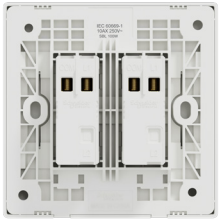

Vivace E offers advanced functions, easily adapting to diverse projects and customer requirements.

High quality and sustainability

All materials used in Vivace E are sustainable.

20000+
Mechanical switch ON/OFF Lifetime*

5000+
Socket plug in/out Lifetime*

Safety
Compliant with BS, IEC standards

Environmental Data Program

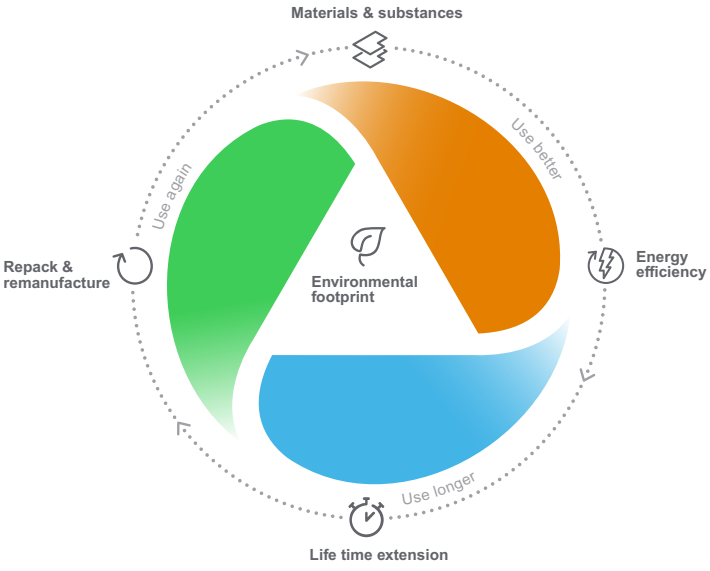

Next-level transparency for better-informed product choices

The Environmental Data Program is a framework for how we measure, categorize, and compare the environmental attributes and footprint of our products.

Using a rigorous, fact-based methodology, the program provides environmental data from across the product lifecycle.

Five data categories across the product lifecycle

Use Better: How sustainable a product is, including environmental footprint, materials and substances, packaging, and energy efficiency.

Use Longer: How a product's life time can be effectively extended in terms of repairability and updatability.

Use Again: How a product can be reused, from dismantling and remanufacturing to recyclability and manufacturer take back.

With this transparent, verified data, customers and partners are empowered to make conscious environmental choices and accurately evaluate and report on sustainability performance.

All our hardware offers have an associated environmental data available on se.com product pages.
